MOSCOW PUSHES PEACE WITH MUKDEN—REJECTS PROPOSALS OF NANKING

Manchuria May Meet Russians at Dairen Conference

WASHINGTON AWAITS REPLY FROM NATIONS

Peace Pact Signatories Not to Act If Independent Peace Is Likely

Definite word that Nanking had expressed a desire to enter into ne-gotiations with the Soviet has reached Washington, though the Chinese Foreign Minister denies that arrange-ments for such a discussion have yet been made. Tentative proposals from Nanking have been rejected by Mos-

cow.
Meanwhile Moscow states unequivocably that parleying between Manchuria and Moscow is on the way, and dispatches from Tokyo declare that a conference at Dairen is anticipated, at which Nanking, which appears to have been left out in the cold, may attempt to intervene.

Washington is awaiting replies from the five governments to which proposals have been made for takaction among signatories of the Kellogg pact. Such action, it is declared, would not be pushed if the disputants show signs of settling their quarrel between them.

SPECIAL FROM MONITOR BUREAU

WASHINGTON — The State Department is interested in seeing the Manchurian crisis settled peacefully and is not concerned with the agencies by which the agreement is reached. This was the comment from the content of the German people" was defeated 318 to 82 with four abstentions.

NEW YORK (A)-The New York Times, the St. Louis Post Disnatch and newspapers affiliated with them in publishing reports from Commander Richard E. Byrd's expedition. announce that Commander Byrd safely returned to his base. Little America, Nov. 29, after a successful flight across the south pole, during which he surveyed much adjacent territory. The flight was without mis-

hap and everything worked well. The Times announced it had been directed by President Hoover to forward through its wireless station the following message to Commander

'Commander Richard E. Byrd, "Little America:

"I know that I speak for the American people when I express their universal pleasure at your successful flight over the south pole. We are proud of your courage and your leadership. We are glad of proof that the spirit of great adventure still Our thoughts of appreciation include also your companions in the flight and your colleagues whose careful and devoted preparation have contributed to your great success.

"Herbert Hoover."

BY THE ASSOCIATED PRESS Commander Richard E. Byrd, safely back at his base, Little America, from a flight to the south pole, holds the unique distinction of being the only man to fly over both poles

By bending to the use of his courage and skill the tools supplied by modern mechanical and natural scientific progress, he achieved within 31/2 years what no other polar explorer has accomplished in a life-time—visits to the top and bottom of

the globe by air.

Flying to the south pole, he did in less than a day what it had pre-viously taken more than three

months to accomplish. The antarctic flight was beset with difficulties far greater than those en-countered in Byrd's trip to the north pole, which was made May 9, 1926. The distance of each flight was about

the same, 1600 miles. On the flight to the north pole and back, made in 15 hours, 30 minutes,

Commander Byrd navigated his plane to and from the south pole over a jagged mountain chain with sentinel-like peaks that rise anywhere from 10,000 to 15,000 feet. The antarctic is mostly barren of plant life and without human inhabitants and even animals, due to its severe climate. Even in summer, which is at hand there now, there are no inhabitants. In the arctic there are Eskimos

and summer vegetation Byrd Flew Over South Pole Commander Byrd flew from Spitzergen to the north pole over floating ice fields, arising only a few feet above sea level, with here and there open leads of water. From the edge of the southern ice barrier he flew 400 miles over an accumulation of ice rising 150 feet or more above the sea over mountains to the polar plateau

and back again.
Commander Byrd's flight to the south pole is a striking demonstra-tion of the conquest of modern methods of travel and communica-tion of distance and other physical obstacles encountered in polar exploration when compared with simi-lar feats accomplished by older

or two continents.

there might be a connection between plorer to reach the south pole, using the water beneath the Barrier, where dog sledges and starting from a base trip there and back, a total of 1545

FASHION CAUSE OF WOOL WANING IN POPULARITY

Given as Reason at International Conference

GROWING IN BRAZIL BRADFORD, Eng.-The international wool conference has been concluded here. The proposal to form an international wool federation was adopted "in principle" and it was agreed to circulate draft rules to the various countries for their consideration. A special co-ordinating committee with powers to adopt definite statutes for the federation will meet

diate extension of this practice im-possible. A resolution was passed pledging the countries to send a copy tween Para and Japan, according to to the procedure, rules, and methods reports current here. wool conference to see whether he could produce a uniform draft.

The President moved a resolution. which was passed unanimously, calling for abolition of the so-called biasse clause, which provides for the reduction of contract prices in the event of a fall in values, but does not allow an increase if values rise. There was also a resolution urging a more intensive campaign to popularize the use of wool. While the conference did not approve the French proposal for concerted action in this lirection, the countries pledged hemselves to do what they could in-

COLLEGE COURSE THOUGHT FACING republifronts. RADICAL CHANGE

Four-Year Period Believed to Give Way to Junior Preparatory Season

SPECIAL FROM MONITOR BUREAU

NEW YORK-The four-year col-NEW YORK—The four-year con-lege course leading to an A. B. de-gree is passing and its place will soon be taken by "Junior colleges" which will prepare students for university work in professional and business fields, Dr. Ray Lyman Wilbur, Secretary of the Inter asserted in an address before Interior. twenty-first annual session of the interfraternity conference here

Wilbur said he believed this development would come about naturally because "the four-year course is too much for the man who wants just an elementary course and not enough for the one who wants advanced work.

fessional schools and schools of in the House of Commons and withbusiness, are becoming universities, others will become junior colleges and others which are doing good work in special fields will continue four-year courses for some time to come, he added

Dr. Wilbur expressed the view that college fraternities must "go into higher gear" to meet modern conditions. "In the long run, something must happen to the fraternity to make it more real to those between 20 and 24 years old," he said.

American advance in ecoyouths who have never known hard-ship. That is why football teams are

J. R. so largely made up of men who are working their way through college, cell face a little adversity."
Collier H. Young, Indianapolis, Fraternities can

Dartmouth undergraduate, deprecating the excess of luxury in many fraternity houses, declared that thousands of young men come every year from modest homes all over America and enter the mansions money has built for them.

"There is too much luxury in the fraternity houses of today," he said. "The transition from the campus to the world is hard enough anyway, and it is only being made the more difficult by the soft lights, yielding divans, panelled walls and two-inch carpets that the modern fraternity to obtain the objects in view. house is providing."

Program of Construction Proposed at Rochester

TO THE CHRISTIAN SCIENCE MONITOR ROCHESTER, N. Y .- Rochester's answer to President Hoover's call for expansion of public works programs as a move to stabilize national prosperity is a \$7,000,000 to \$8,000,000 building program which, if funds are appropriated, can be launched early in 1930.

Responding to the President's call, Stephen B. Story, city manager, has outlined construction projects which can be undertaken immediately without over-expansion and economic wastage. In a statement on the President's request Mr. Story said: "Unquestionably, President Hoover's call to the agencies of this country which may undertake heavy con-struction programs in the immedi-ate future will be of tremendous value to the entire country. The expenditure of large sums of money for these projects will be for objec-tives of benefit for a long term of years, and will, in turn, put the money so expended into circulation in such a way that its effect on all classes of people will go a long way to renew or to continue their prosperity and to offset any impending

Business and Beauty of Far Corners of World Mingle on Famous Avenue in Paris

GREAT AVENUE OF OPERA IS HUB FOR PARIS TRADE

Tourists of All Nations Flock to Famous Center for Shopping

SPECIAL TO THE CHRISTIAN SCIENCE MONITO PARIS-It would be difficult to find a better example of the streets of a great modern city than the straight, wide Avenue de l'Opéra, occupying as it does a central position among the great commercial avenues of Paris. The Avenue, which was constructed between 1854 and 1858, enjoys the distinction of being the first street to be lighted by electricity. Few streets of Paris are more frequented by American and English tourists or are more thickly sprinkled with shops of all nationalities, than this famous resort.

The shops of the Avenue are largely devoted to bric-à-brac, jewelry and other commodities that are likely to attract particularly the eye of the tourist. Up in the windows of the higher stories may be seen the names of famous dressmaking firms and offices, all of which go to establish this famous thoroughfare as, one of the great meeting-places and shopping centers of Paris.

Dominating the Avenue is the stately Opéra House, the building of 36. that probably first of all in Paris name of which is actually the Académie Nationale de la Musique—
is comparatively modern, having been erected between 1861 and 1874.

It claims to be the largest theater in the world as room. in the world as regards area, since it posed five years ago. He would use occupies a space of nearly three what is known as the hydraulic fill acres. Its seating accommodation, however, is exceeded by others, since use in the making of great dams. it is only designed for 2156 people. It is in effect to suck up the sand Its magnificent façade, with balcony, through great pipes and pour it beis distinctly impressive and its tasteful illuminations at night enhance its generally artistic effect.

Under its charitable and jolly concealment, twisted springs and stretched upholstery were for-

above the sill and when the sun shone through the rose gauze it was broken up prettily by the interstices in the wicker and then spattered on the upholstery in an enlivening way.

The east wall over the low book-

A Hanging to Conceal a Smudge The black in the chintz design

to our lives or habits, we have not turned out a true American art, inturned out a true American art, inturn I felt, we must use black as a foil, As I sat on the couch and surveyed the general effect of our scheme, became depressed by the smoky tower of soot which reared itself on the wall above the radiator, placed at the left entrance door. At last a picture took shape in my imgaina tion. It was a beige panel with sharp

why could I not transfer the humor-ous animals to the beige canvas? I bought the amount needed of both materials and had a rapturous day transplanting these denizeus of an imponderable world onto the sober background. There were deer, gazelle, fawn, rabbits, men, ele-phants. I cut them out and stitched them in similar relationship on the material, and the result was a panel which in its charm and sophis-tication made one rejoice that the radiator wrote its autograph so

pressions rushed into my thought in one instant. Before me lay some heavy beige canvas and not far off a design on cretonne of whimsical animals, all black and flat, springing

through the air over a scarlet back-ground. The scarlet, of course, could ot be used in our color scheme, but

mudgingly on the dull oatmeal Over and under the windows the paper was bubbling and streaked. In the case of the west window, this was hidden by the couch, but how might it be concealed where it showed so conspicuously at the north? A new fabric design was not justified, lest the room become rest-less and look like a makeshift. Thus ar none of our devices revealed themselves as expedients; they were pure decoration, in good taste and

really of commanding interest.

Concealing Unsightly Wall Paper To solve the final difficulty I bought another India print identical with the one on the east wall, and cut the border off the four sides. One

strip the full width of the border I tacked under the window, where the ends were obliterated by the curtains and by a neighborly table on one side and a love seat on the other.
The remaining borders I cut into half widths and tacked between the ceiling and the woodwork over both windows.*

The room had become gay and individual. The only considerable expenditure had been the slipcover. Otherthe concealments had cost The bedroom presented merely a

problem of overcrowding. The twin beds encroached on the window space on one side and the door space on the other. This threw all the lines out of proportion and made the room ugly. We were not so economical in finding our solution, but the ladies said they did not mind spending a little for what they could take away with them. So we ordered a carpenter to build a two-tiered berth, on which would fit the springs and mattresses from the beds. He was much amused by this commission, but he executed At my earliest opportunity I set forth for upholstery departments. So definite was my mental picture, how-and habitable not only in hours of ever, that I could find nothing which satisfied it until suddenly two imended in the satisfied it until suddenly two imended the world to industry.

The Auction Game As We See It

By CARL GREENLEAF BEEDE Summer days are the auction days for the country. Then those of us who have the time find the sales in farmhouses or small villages to be one of the most welcome summer diversions. Returning to city homes, we notice that auctions are still being announced frequently,

dealers in antiques and art objects using more and more this method of moving their stocks during the cooler Many of these occasions are notable

for buyers and for observers as well. It might be guessed that there would be no bargains comparable to those found at country sales. With plenty of moneyed buyers in attendance, top prices might be expected for every item. This does not always follow by any means, as alert dealers many

times buy greatly to their advantage. For the person who is not buying, but merely looking on, there is plenty of entertainment, particularly if he knows values. One little game that can be played alone or with several others is, to note in your catalogue the was unexpected. doing this instantly as it appears to be sold. If you flatter yourself that you have a rather correct notion of values, an hour's or an afternoon's test of this sort may hold some surprises for you, and chuckles for your companions.

It is often remarked that auction of walnut, maple and mahogany. Historical interest and association with men who were prominent in the public life of the colonies distinguish numerous other items. If the information which I have so far secured companions.

Should it happen that you want to become a good judge of prices, the sales and the exhibitions that precede them offer the best training ground I think of at the moment. At the pre-sale views anyone may look over each thing at will for points of merit or demerit. All wise bidders do this, and what they so learn usually would explain final prices.

Following the same course will do much to build up for anyone a keen and well-balanced judgment on qualities and values

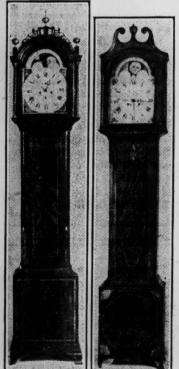

An Opportunity-If Leisure Permits Some examples of erratic bidding were both surprising and amusing at recent sessions at the American Art Association-Anderson Galleries in New York. It is not to be expected, in these days, that any decent gateleg table can be bought for less than \$250, and it is well known that a fine one might go well over \$1000. In fact, it was expected that the latter price would be passed in selling the notably excellent one which is pictured here.

Actually it was knocked down for \$300, an out-of-town dealer taking it. I will be curious to learn what it them to absurd heights.

A compatition of this sort was a supportant an event as a compatition of this sort. brings when it is sold again in the same gallery, as I am told it will be

A Remarkable Clock Case

is another inconsistency that is diffi-cult to explain. It is usually concult to explain. It is usually considered that Willard clocks with labels reach about the top level. In the early November sale, with the gate-leg table, there was an Aaron Willard mahogany tall clock with the maker's label inside the door which sold for \$1100. A somewhat similar timepiece by a less noted maker, Joseph Doll, brought nearly four times as much, or \$4100. It is quite true that the Doll case carried control times as much, or \$4100. siderable marquetry and that the american eagle was inlaid in the more elegant cabinet work. A dozen upper part of the pendulum door; years ago \$15 would buy a very

A Spur to Laughter

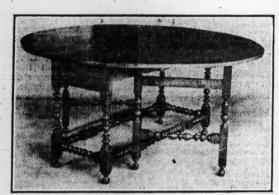

TANDERING about New York looking for surprises, which are so plentiful in the shop windows, I came to a display of modernistic furniture-and laughed. Imagine sleeping in a box, instead bed! It would be the most natural thing in the world to roll out of it, and when a supposedly grown person, full of years and dignity, finds himself on the floor without the slightest fore-knowledge, it strikes me very, very funny.

It's years since Lisa rolled out and landed on her shoe, to her amazement and disconcertion, and I still enjoy it. (Lisa is tall and has a very

strict sense of propriety.)
The chairs, too, are amusing. Surely they were made just for fun not to sit on, not to use, seriously! They even have compartments, in curious places, which would be very handy for putting things away, but awful when one is in a hurry.

And the immense hassocks, how gay and inviting! I wonder it one could sit on the very edge. It would be fun to try. If we had a few of these we could do away with our chairs, which do not fare so well at ur house. They come apart.

Just what one would do with a table that has one and a half or three tops rather puzzles me. Perhaps the alarm clock on one, a lamp on another, and a sewing basket. There's a fine desk, too; and a really nice bureau with ever so many

Courtesy of the American Art Association This gate-leg table, of Virginia walnut, 5ft. 3in. long, is an unusually fine piece. It sold recently at a New York auction for \$300

A competition of this sort was any sale held in recent years. staged at another New York sale. Then, on Nov. 2, a pair of Chippendale chairs had gone to a certain A Remarkable Clock Case bidder for about \$650. A few minutes The range in prices of tall clocks later the auctioneer announced that

down price.

This meant that they must be put again, which they were, promptly. On the second appearance the pair went up to \$1350 before the bidding stopped. Whether or not the two claimants who figured in the first sale I do not know. Presumably they did.

A High Priced Windsor

Windsor chairs have been increasgood one. Now, when \$75 is charged for one not so good, no one shows surprise. Just what the highest price paid for a Windsor chair is I do not know. At the moment, however, I do not recall anything, except in writing-arm type, exceeding the \$1000 reached at the MacDaniel sale in New York, when the comb-back armchair pictured here changed hands. Windsors frequently have delightful vivacity and graceful pro-portions, worked out with the details that are in rare taste. In no example which has come to my notice are these different features more desirably combined than here. Undoubtedly the buyer appreciated these facts.

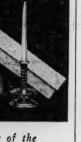

Important Event Announced

There is announced for the first week in January a sale at the American Art Association Anderson Galleries, which in some respects is most remarkable. It is to be held by the heirs of Philip Flayderman of Boston, for 40 years a dealer. Unknown to anyone outside his immediate family, many of his finest acquisitions were not sold but were kept with the love of the collector.

The importance of these pieces is

suggested by the fact that nearly 50 of them bear the labels of their makers. Among these are a pair of matched card tables and a Chippendale tea table by John Townsend; a sideboard and a serpentine front desk by Benjamin Frothingham; tambour secretary of unprecedented merit by John Seymour & Sons of Boston, and a sideboard to match Many mirrors also carry the imprint of their makers or of the dealers who

first sold them. One of the much-desired articles

Reproductions of the

London

I hear that the Board of Guardians of the little town of Downham Market, Norfolk, has recently discovered that 13 chairs, which for many years have been used in the master's office and board room of the workhouse, are old Sheraton and Chippendale

I understand, for approximately \$1250, thus saving the ratepayers a penny or two in their tax rate.

The recent advertisement offering for sale genuine pieces of material from the late Queen Victoria's coronation ball dress, adds still another to the bewildering diversity of objects now collected. The list now includes such things as ancient falcon hoods and even old carved mangle

A still more original hobby is that of the clergyman mentioned by Sir James Yoxall, who collects ancient stay-busks. Some of these humble stay-busis. Some of these numble but now very rare articles are made of wonderfully carved wood. Others are of whalebone, also carved; still others of long pieces of ivory, made for the stomacher of far-off Eliza-

Many dollars, again, are now some times asked and obtained for late Georgian wooden food howls, which cost only a few cents when originally made. Women collectors, in particular, have discovered that these ancient elm, beech, and other wooden bowls-all of which are known as "treen" - mellowed as they are by time, wear, and countless polishings, make delightful receptacles for cut flowers if furnished with a modern metal or glass lining.

Happenings in

pieces.
They have accordingly sold them,

bethan days.

The demand for treen has even extended to eighteenth and nineteenthcentury cheese stands-large round platters with steep sides supported on three legs. These are used today as stands for palms and other plants and - crowning touch of all - as chairs for pet dogs.

Hostages to Fortune

The Countess Tolstoy's Later Diary, cause they injured the material wel-1891-1897. Translated from the Russian by Alexander Werth. London: Gol-lancz. 12/6 net.

THOSE who find Russian insecond volume of the Countess Tolstoy's feminine characters after his marriage. She computed the difference in mood between reminiscence and a mere plained of the essay, "What is Art?" and modern critics echo her impatience. She is very penetrating:

It is as envivid and interesting. It is as envivolenced the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and a mere record taken at the time. It is a second to the remaining the time in the time is the difference in mood between reminiscence and a mere record taken at the time. It is the difference in mood between reminiscence and the time. grossing as any novel and its portraiture is masterly. The Tolstoys' deprection why, and he said his work wasn't going. And what was he writing regret; the other gray, clear and domestic life is given the acid and de-dout? About nonresistance. No tailed clarity which a bare landscape wonder! . . . If he could only give down before a sheet of white paper domestic life is given the acid and de- about? has on a late autumn day. There are twent to the true creative torrent."

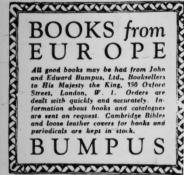

The Diary is one of the most interlish and absurdly half-true those coness's successful attempt to persuade the Tsar to remove the ban on the ten; page after page recalls by its "Kreutzer Sonata" - an attempt unaffected literary excellence that ance. which does great credit to her cour age and skill but less to her motives; secondly, the problem of the property. Tolstoy was at this time about to make over his property to his family and to renounce his copyrights, and the Countess could never regard this as anything but a hypocritical gesture. The renunciation did not, in

teachings not so much because they women.' were difficult to live up to but be-

ENIS TILDEN LYNCH, whose

factors which have enabled the electrical utilities to circumvent adequate public regulation. fighting against the Federal Bank, it is difficult to discover what he did to quate public regulation.

There is, for instance, the inability gested or attempted in other regions. These include interstate compacts, the public service commissions justify such a claim. Out of office and in scholarly retirement, he did contribute manfully to the fight upon slavery. And, as the candidate for contract control, the Canadian Mu-nicipality League, control through the Presidency of the Free Soil Party, he stood on a platform which was substantially that which carried Lin-

coln to victory in 1860. And yet the history of the anti-slavery agitation does not credit Van Buren with having been an originator, or even a pioneer, in this great national reform.
While denying to Mr. Lynch complete success in this endeavor to make a truly great figure of Van Buren, one must credit him with having successfully accomplished the task of writing a most interesting book on a very picturesque era. The times of Van Buren were more interwill make your mental shelves appear a storehouse of wisdom to the less fortunate, without putting you to the bother of studying, these are your

place may seem to be extended when the flower borders and the place may seem to be extended when the flower borders and the place with the place two shrubs would be supplied to the place two shrubs with the place two shrubs would be supplied to the place two shrubs with t shrubbery plantings are laid out around a central square of turf, but to some gardeners this plan is less interesting because one can take in the entire garden picture at a single the entire garden picture at a single space, if sufficiently large, would be suitable place for a grouping of glance. There is another method a suitable place for a grouping of which may be used to lend an illusion garden furniture. If too small to accommodate furniture, interest could be provided through the use of a bird if one but possesses the courage to bath, sun dial or gazing globe as a

is created by the use of a series of small gardens, kept separate by having each lightly screened from the other. When a place is laid out in this manner one's garden stroll takes on the air of a little tour.

The effectiveness of this plan depends largely upon the type of boundaries used to divide the gardens. Above all, they must be informal in character and not too much in evitore a series of the property must have a strong fence for protection, as well as a few vines or shrubs for screen. If tall perennials are decided upon for the division of the gardens, one must necessarily be without be a problem, for in the spring the four gardens might be combined to character and not too much in evitore. Above all, they must be informal in character and not too much in evidence, lest the result be a series of flower-filled pens rather than a garden's proup. A scattering of shrubs, a low and lightly clipped hedge, or merely a screening growth of tall perennials will suffice to keep one from noticing what lies beyond the small garden in which one happens to be standing. One great advantage in using this plan of several gardens,

BATCHELDER 器 TILES 器器

A MANTEL OF GENEROUS IMPULSES

CIZE is not the only thing to consider in the designing of a mantel. Large or small the mantel is the focal point in the decorative scheme of any room. It is invariably the center of interest. It may be large without being

obtrusive, or small without being niggardly. It is a matter of scale, form and color. Moreover, the mantel is a permanent, built-in feature and will outlive furniture, rugs and draperies. Therefore, it should be of such character that it is adaptable to any reasonable decorative treatment. If it is really beautiful the next generation will share our pleasure in living with it. BATCHELDER TILES of the mottled finish type are peculiarly beautiful for interior work. They have a mellow,

pleasing color effect that may be depended upon to harmonize with fine woods, furniture and rugs.

BATCHELDER-WILSON COMPANY SAN FRANCISCO NEW YORK

English Borders Gay With Late Color

faintly by a mass of tall pink monarda (bergamot) and fully by bushes of monthly roses. The left-hand border presented a mass of blue and silver. Pale blue agathea coelestis shone through feathery masses of gray stems and leaves, and little double silver-white flowers covered a multitude not of sins, but of flowers that were over, such as the cobalt-blue dwarf delphinium chinensis, and

London

WAS not the only one to admire
my borders at half-past eight on
one sunny morning last October.
Two gorgeous pheasants were parading the broad grass path examining the flowers with interest, although subsequent investigations showed that they were looking for the ripe berries of St. John's Wort.
The borders are very long and lead from the house terrace to a great spreading oak tree.

London
rose the tall spires of deep blue salvia coerulea (brought by me from Chile)
which flowers profusely till frost, and a mass of low-toned green foliage denoted the shrub abutilon whose pale blue flowers delight one earlier in the year. The finest of all dwarf asters (starworts) here was Rudolph Gothe with immense mauve flowers in spreading masses. A scarlet maple and a golden eleagnus hid the stalks of flowerin peaches and cherries, and the blue and silver of the sea thistle. Looking down this border on

By MRS. PHILIP MARTINEAU | carpets of blue lobelia. At the back | sedum spectabilis planted at the feet | London | rose the tall spires of deep blue salvia | of the buddleias.

from the house terrace to a great spreading oak tree.

A silver and pink effect still obtained at the commencement of the right-hand border. The silver-gray of a weeping pear (Pyrus angustifolia) was carried on by artemesia Palmeri, and arching sprays of a silvery-leaved berberis (dictophyllus) whose pearly berries were just turning to coral. The pink sidalcea, phlox, and sedum spectabilis in this corner were over but the color was given faintly by a mass of tall pink monarda (bergamot) and fully by bushes

and a glottal delphiniums, though here and the past delphiniums, though here and the blue and silver of the sea thistle. Looking down this border on that day in mid-October one had the impression of great masses of rose-color (asters Barr's Pink) and blue salvia. In and out of various shrubs such as cistus, styrax japonica, cornus florida and silver cornus were many plants that had finished blooming, such as penstemon heterophyllus, red bergamot and clematis.

Across a path the border began again with orange geum (the everpolyllus, such as rhododendrons, azaleas, mountain laurel, white and silver of the sea thistle. Looking down this border on that day in mid-October one had the impression of great masses of rose-color (asters Barr's Pink) and blue salvia. In and out of various were many plants that had finished blooming, such as penstemon heterophyllus, red bergamot and clematis.

Across a path the border began again with orange geum (the ever-plant) and the blue and silver of the sea thistle. Looking down this border on that day in mid-October one had the impression of great masses of rose-color (asters Barr's Pink) and mauve (Climax) at the back, with primary the strength of the sea thistle. Looking down this border on that day in mid-October one had the impression of great masses of rose-color (asters Barr's Pink) and the blue and silver of the sea thistle. Looking down this border on that day in mid-October one had the impression of great masses of rose-color (asters Barr's Pink) and the blue and silver

SPECIAL CHRISTMAS

Every Christmas, thou-sands of our readers find BETTER HOMES & GARDENS an ideal gift for their friends. So this year, we are making a special offer to cover gift subscrip-tions along with your own.

The regular yearly price of BETTER HOMES & GARDENS is 60 cents. Our special offer permits you to send two or more subscriptions at 50 cents each. So for \$1, you may send your own and a gift subscription, or you may send two gift subscriptions.

For each gift subscription we send you a special Christinas Greeting Card which you mail personally to your friend, announcing the subscription.

In short, this Christmas offer gives you: I. A special rate for gift subscriptions. S. A special rate for your subscription. S. An attractive Christmas Greeting Card for you to send to each gift-name.

That makes it well worth your while to mark the coupon below, and send it at once.

OUT TODAY

The inspiration of their experience, as told by Emily Newell Blair in the December issue, affords a good example of the practical help on home problems that has made BETTER HOMES & GARDENS the largest non-fiction monthly magazine in America.

FORTUNATELY for Jared and Marian, they realized that having the home they wanted was not so much a matter of money as of taste—taste in distinguishing the essential from the nonessential, in choosing permanent beauty rather than passing fancy.

Even though it seemed that the unsettled nature of Jared's business would deny them a real home for years, they turned this apparent handicap into a definite advantage. From their experience, other families who must face similar situations may gain help and inspiration. And all of us will enjoy a reading acquaintance with this delightful couple, through Emily Newell Blair's feature article in the December issue of BETTER HOMES & GARDENS.

What to plant in your window box for zero weather. Why not use your window boxes this winter? How glorious it is to have them fresh—green—growing—right through the coldest weather! Not only do they brighten the exterior of your home, but they also provide a pleasant frame to the winter view from your windows. What to plant?—another discovery in your December copy of BETTER HOMES & GARDENS.

Do you know the secret of room X?

"Room X costs the least of any room in the house, yet often is the most valuable," says Leland A. McBroom, creator of original houses, in presenting a new thought on building for the present with an eye on the future. Which room is Room X? What makes it most valuable? Vital questions, indeed, particularly if you plan to build or remodel. Vital reasons why you'll enjoy Mr. McBroom's "Houses That Meet Growing Needs," in BETTER HOMES & GARDENS for December. Then, too, you'll want to read Remaking the Old Interior—Hints on Successful Roasting—Home Gifts That Are Different—Things for Youngsters

to Make-New Aids to Housekeeping-How Christmas Plants Grow Making Unusual Christmas Goodies.

These brief glimpses are only a fore-taste of the good things which the December issue of BETTER HOMES & GARDENS holds in store for you. It is packed with articles you'll enjoy—with ideas you'll be glad to use. When you read it, you'll understand why, in the short space of seven years, BETTER HOMES & GARDENS has won more readers than any other non-fiction monthly magazine

The December number is on sale today. Ten cents, or many times that amount, could hardly buy a bigger investment in real living. Make a mental note to get it at the nearest news-stand.

EDUCATIONA

. 'Here's Your Breakfast, Mother'

AP, tap. What was that awakening noise? Oh, now I remem-bered that I must be up, for I had a full day—I had spoken of it the night before at dinner. Up, to see the man of the house breakfasted and off! Up to see the two children hilarious by the funny little candies fed and playing constructively! Breakfast dishes washed and then to hats in yellow, red, green, rose, black,

Tap, Tap. Someone at the door.

"Here's your breakfast, Mother." Twelve years of vigorous active boy-hood entered with a tray smiling. There it all was as I like it—orange juice in a green-stemmed frosty glass, thin whole wheat toast, crisp bacon and steaming hot cocoa. "Oh, thank you."

"Daddy's eaten and gone—I gave him scrambled eggs—soft, just as he likes them." he smiled. "I knew you had a full day. I thought I'd fix it so you could start

"Thank you-it's a gorgeous idea everything is so good!"
"Oh, well"—a pleased boyish grin,

then a slow return to responsibility
—"I guess I'll feed the kid now" (this of his nine-year-old sister)—
"She's making our toast." He was halfway down the steps

when he called back: "I left your door open so's you could call if you want more cocoa."
As I listened to their chatter, I looked at a full day with different eyes. No breathless beginning. No trying to catch up with one's breath.
Of course, this wouldn't happen every day: I wouldn't let it, but oh,

the joy of it once in a while! It started, I believe, several years ago when a maid was a matter of course in our household. Sundays and Thursdays the evening meal was informal and somewhat festive with laughter and intimate talks. The children—the little girl often in her high chair—stayed in the kitchen and "Daddy" was in and out, everyone interested in the menu and how it was prepared. Soon the boy was asking for some part in the inter-esting process. He could butter the toast, or wash the ice, or turn the

gas up or down.

The things he did were spoken of as being important to the ultimate result and he learned to take pride in doing each thing well. If the telphone rang or any other call of my came increasingly easy to hand over to him whatever stirring or beating or watching was going on and rethis was always freely spoken of by "Daddy" and the children's part in the making was always emphasized in my "Thank you's" to these com-

labor was the ideal way to meet such a situation. The 11-year-old boy chose to start the breakfast and help in the for this a new book is started, where preparation of the other meals, while the method of sound must only be the 8-year-old girl chose to set the used to work out a word for the first course of reading is unsuited.

A year later neither of them shows signs of shirking. It has never been a burden—there have been numerous seventh will follow next Saturday]. lapses, many of them suggested by me at sight of some entrancing di-version. But, on the other hand, there have been many "spurts," when breakfast or lunch has been prepared with no adult assistance.

During this year company for Sat-During this year company for Saturday lunch has become almost an institution with the children. They plan the menu with an eye on their own accomplishments and frequently prepare the lunch alone. On cool days the boys cook steak on an improvised fireplace in the back yard and put it between buttered buns and eat it with steaming cocoa brought from the kitchen. from the kitchen.

This year we had a family camping trip in the mountains, where all our combined culinary skill was displayed. The fact that children are capable of more than is required of them in the average home was proved them in the average home was proved the capable of the capable of more than is required of the capable of more than is required of the capable of more than is required to the capable of t every day here. Flipping a pancake—yes, actually—is the most cherished —yes, actually—is the most cherished accomplishment of the father in this family, and this art he handed on to family, and this art he handed on to can be gained in the study by American begained in the study by American can children of American Indian life. his son. The pride, the fun, the happy relationship established by that feat would alone justify the knowledge of cooking being imparted to a boy Here he learned to broil a steak, to make a quick, delicious potato soup, to sizzle bacon done and not burned to fry an egg in bacon grease so it is neither greasy nor leathery, to cook corn-on-the-cob so its sweetness is retained and it is not overdone.

Glow of Being Useful When he has done any of these things he feels the glow of being useful, of being on the winning side, of meeting life boldly that is as sat-isfying as the swimming contest he won last year, that is as exhilarating as the blue ribbon awarded him in the miniature airplane contest this spring. And may some day prove even more useful.

On our return we-the parentswere invited to a dinner party in our own dining room. We were asked to wear our dinner clothes. There were wear our dinner clothes. There were other guests—our children's friends—three girls of 9, in thin party frocks; three boys of 12 all shiny in their Sunday best. At 6 we sat down. Flowers and nut cups were there Service plates were on and cups of clear soup were brought in by both children working in a team. They sat down with the last cups and joined in the gayety. When that, and crackers, were eaten the boy excused himself to the kichen while the cups were carried away by the girl (leaving the plates). She brought in a dish of peas, a dish of baked potatoes, pickle and strawberry preserves. Soon the boy appeared with a huge platter of broiled chops—they were salted and peppered, too, and done to

Next came fruit jello—oranges, bananas, pineapple and cherries— made the night before and molded in little animal molds, served with

orange, blue and white with every conceivable brim and every possible shape and crease of crown—I did not move from my seat as honored guest Before the dinner I offered few suggestions and did no actual work. The dinner was declared by all a huge success, and was talked of afterward by the whole neighborhood.

quite straight)? and iced drink preher eyes shine and her lips smile? Have you ever heard the "Tap! Tap" morning knock (when you had come in with a breakfast?

If not, you haven't seen all the self reliance and wholesome pride that can be seen in the face of a child!

Lessons of Actual Reading Are Begun

gether; they are such friendly little fellows, we have already found. But you must be careful to say them in the right order, as they show themselves in each word, for they all have their right place, and do not like to be misplaced."

A first reader is used called "Songs the Letters Sing" by S. N. D., pictured by Margaret Tarrant.

participation to a definite and conscious accomplishment in the matter scious accomplishment in the matter of cooking. When this point was reached, it was understood that a clean kitchen afterward was part of the stunt and there has never been a failure in complying with this part of the activity.

A year ago it became necessary for us to let our maid go and do the work ourselves. In a family confersions well discussed. The functional importance to consider how that is glimpsed, as Mary begins to read words she knows by sight, and forms others quickly. Little words in composition of the activity.

A year ago it became necessary for use to let our maid go and do the work ourselves. In a family confersion was not been, intellectually, wasted. Difficult, but sure-to-level wasted. The functional importance to consider how that it is a matter of some educational importance to consider how far this opinion is well founded and in what respect it is defective.

Intellectually, there is no doubt a good deal to be said for it. A third or fourth class honors man may find it difficult to show that his time at the university has not been, intellectually, wasted. Difficult, but surework ourselves. In a family conference it was decided that a division of train the child in recognizing the

What Does It Mean to Be Educated?

ticular attainments would we, as young people, set out to acquire in order to become "well educated"? world peace not as an equilibrium of selfish interests maintained by fear but as a possible world fellowship and world co-operation." The autumn months, with the opening of schools and colleges, turn the rather a large contract, and an imthoughts and actions of countless probable, or an impossible dream.

Yet, as Dr. Coe aptly points out, it young men and young women toward is the ideal of modern youth: it is institutions of learning. It is the way toward which the presentuniversal quest for education. Some day thinking and acting young men will go one way, some another. Some will take one course, some another, same book from which the above will take one course, some another. Yet all are headed toward the same professor also outlines what he calls the "ten points" of a well-rounded All, or most all, if sincere in their purpose, want to be "well educated."

Just now, when the so-called "youth movement" is sweeping the vorld, and young people everywhere are having an active part in the affairs of our fast-moving civilization, it is well that every serious-minded young man and young woman give sober consideration to the question of education. Is it merely to be the acing how to do some particular thing? Will it be a profession or a trade? Is the impelling aim only that of making money? Does it include some-thing of the arts and sciences? Does it develop the individual taste for good books, good music, good pictures? Does it promote the desire for helpful service? Does it bring God and humanity into the life program?

Vocation of Living

There are serious problems for any youth to consider. Yet they all have to do with education. Dr. George A. are certainly to be considered by anyto do with education. Dr. George A. one who seeks that splendid quality which we commonly call "culture." written many excellent books on the It is the ideal, of course, yet it is by subject of youth and of education, no means impossible. On the constates in a recent treatise that education in its broadest sense should many—even by a great number who teach us, or bring to us the actual were denied the privilege of attendvocation of living." He defines this ing college: One may attain a college

SPECIAL GIFT COMBINATION

HAVE you friends who are interested in Christian Science, but who are not yet fully acquainted with the Christian Science literature? If so, would you not like to introduce the periodicals to them? This special gift combination offers you an unusual opportunity to do so-to remember these friends with a gift of lasting value.

During the months of November, December, and January, the following Gift Combination is offered for ONE DOLLAR:

The Christian Science Monitor . . . 1 month Christian Science Sentinel 1 month The Christian Science Journal. . . . 1 issue Christian Science Quarterly 1 issue

Since this is a special offer, no changes will be made in the combination, except that Der Herold der Christian Science or Le Héraut may be substituted for the Journal, and one of the translated Quarterlies will be sent in place of the English Quarterly on request.

Take advantage of this offer-fill in and mail the attached coupon. Upon its receipt we will mail the periodicals together with an announcement card informing your friend that the literature is being sent as your gift.

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

BOSTON, MASSACHUSETTS Please mail GIFT COMBINATION and Announcement Card to the following

address: (Inclosed is one dollar in payment.)

Please indicate in the space below if either of the Heralds or a translated Quarterly is desired instead of the regular combination.

poet cannot tolerate more

buckskin moccasins.

HROJGH the grass of yonder trail. This highway, like many anhillside there is drawn a single other, is merely a footpath captured, long and gracefully curving temporarily tamed, made to serve a line. Starting at the rustic bridge purpose which those who first traced that spans the brook, it climbs the it could not have imagined. But no hill by the gentlest slopes, availing doubt it will some day run wild once itself of every stretch of level land, more. Straightened widened, hardened, blackened, deprived of all the yet it ascends almost continuously friendly shadows of flickering leaves, until it attains the brow of the hill it seems entirely the child of our and vanishes at the crest into whatcannot be sure that it has wholly ever mystery lies beyond.

A civil engineer with all his apparatus and the guidance of higher mathematics could scarcely have plotted a more economical route for climbing the hill, and an artist could hardly have drawn a more beautiful but also in the harmony between but also in the property but also in the harmony between the curve. The footpath answers exactly to its purpose and yet is perfectly free, so that it meets every demand vides the page and the pigments; men write, or draw. And when we look carefully at the finished work the eye can make. Lovely as the line that bounds a Grecian vase made for eauty alone, it is at the same time precise and practical—the best way that could have been found of getting over the hill on foot. Gazing at it long and thoughtfully, one cannot decide whether utility or charm was hue of nature's provision, but we the primary consideration in its first uncovered it and we keep it fresh. making, or, in other words, whether it is beautiful because it fulfills its purpose exactly or whether it is useful because it is lovely. The two ends of use and heavily have been and interpenetration of nature of use and beauty have been served and humanity.

One may think of this footpath as a piece of beautiful bold script written on the hillside by the tread of many feet. And it is a highly characteristic human script. Much of the character of the man who first drew the line is perpetuated in it. Had he been a lazy man the curves would wide enough, and for purposes of have been flatter and more languid; winged poesy suffices. It is not for had he been excessively energetic they would have been more abrupt Being precisely what he was, he left precisely this record of himself, which is perhaps the only legible record of him now left in the world. And what shall be said of the thousands who have followed him, never altering or revising his original line by the fraction of an inch? Have they all thought that his first path, struck out spontaneously and without a second's thought of what he was doing, the best of all paths, or have considered that it is best to leave well-enough alone? At any rate, there is a wealth of human nature implicit in footpaths for one who can read them. A clever visitor from another planet might deduce several basic facts about us from this single

example of our pedography.

The smooth, hard, straight highway is almost entirely the product of human skill, but the footpath is produced by unconscious art. We see this in its obvious spontaneity and in its expression of the individual. It differs from the highway as hand-writing does from the cold rigid product of the linotype machine. And yet we know, of course, that the footpath is often the highway's ancestor. There is a road in Connecticut, for example, traveled today by innumerable huge trucks and a steady stream of automobiles, on one can see, at a certain point, the levels on which ran the earlier stagecoach turnpike, the still earlier wagon road, and the primitive Indian

Animal Lovers

We are rather inclined in these days to think that sentiment about

first century A. D., writing:—
"We certainly ought not to treat living creatures like shoes or household goods, which, when worn out with use, we throw away, and were it only to learn benevolence to humankind, we should be merciful to other creatures. For my own part, I would not sell even an old ox that had laboured for me." And Chaucer, writing in the four-

eenth century:

'Tak any brid, and put in a cage. . Although his cage of gold be never so gay . . . For ever this brid wol doon his bisinesse

To escape out of his cage, if he may; His libertee that brid desireth ay. And Montaigne, writing in the sixteenth century:

"And for my own part I cannot with grief see so much as an innocent beast pursued and killed that has no defence, and from which we have received no hurt at all."

Which of us who loves animals to-day, feels more deeply about them than they who wrote such moving We have only to look, too, at early

Chinese paintings to see with what absorbed interest animals and birds were watched by the artists of old: and the worship of certain animals and birds in old civilizations, though taken as a sign of a highly developed consciousness towards them. No! our modern sentiment towards animals parvenu. Nor is it excessive.

... The love for animals aids and abets a general benevolence.—John GALSWORTHY, in the Introduction to An Anthology for Animal Lovers," by ELIZABETH D'OYLEY.

D. Innes, who, like Curry, left but a small body of work behind him; a small body of wo

Ambassador in London against both

lect by the theatrical managers of Shakespeare's contemporary rival and emulator, George Chapman. Reasons, however, are not really far to seek. Avoidance of Chapman is accounted for by his lack of lucidity, his clumsy incoherence of expression and his addiction to cloudy metaphysics, and to incomprehensible allusion, which must be rigorously pruned before his great virtues as a rhetorical dramatist can become apparent.

William Poel, at the Little Theater, has given a recital of an abbreviated version of the two Byron plays, sepa-

hagen's study of Ibsen. Johannes

Berlin Stage Notes

PROIAL TO THE CHRISTIAN SCIENCE MONITOR BERLIN-Three of the older and smaller Berlin theaters have started the new season well with three native comedies which promise to be boxoffice successes. Two of the plays are new, while one is a revival,

The Kleines Theater, in the Unter den Linden, also a boulevard theater with a tradition of native and French and English comedies, has opened the season with a different kind of plece, an old popular play entitled "Nante," by Adolf Glassbrenner, re-written and refurbished for contemporary taste without spoiling the flavor of the original. Nante, the central figure of this mixture of farce and comedy, is a man who always stands at the corner of the street. His words are full of mother wit and native humor. He is an old figure from the Berlin which is fast disappearing. But he used to be for Berlin what the gondolier used to be for Venice, what the coachman used to be for Vienna. Max Adalbert, who plays this rôle, is almost the whole show Music for this reduction. show. Music for this production has been written, and is played by Rudolf Nelson. There are many excellent songs and couplets.

The Lustspielhaus, which celebrated its twenty-fifth birthday in September, has been the home for a quarter of a century of excellent light comedies. Its new offering, Grand Hotel," by the Vienna author, Paul Frank, is worthy of the reputa-tion of this boulevard theater. It is a delightful comedy written round the theme: What will a penniless young man do when forced to dine with a lady at the Grand Hotel in Vienna? The dialogue, as might be expected from a Viennese author, is witty. "Grand Hotel has no errors of taste.

Music News of the World

Jazz and the Symphony Orchestra of Wagner's orchestra provided. But there is ample compensation in the fact that their general usefulness is

Vienna

EW institutions are as conservative as the Symphony Orchestra. For a century and more its composition has remained, generally speaking, unaltered. Of course the number of players has been increased, the technique of playing has in many cases improved. But on the other hand, the number of new instruments admitted has been very small indeed; and the new instruments are all similar to instruments which it included previously. Such is the case with the cor anglais, which similar to the oboe, and with the The circumstances owing to which

commanded a wealth of colors, innimble instruments and heavy instruments; instruments suitable for melody and instruments suited to rhythmic pulsation; similar instruments and strongly contrast ing instruments. In short, it seemed as though anything and everything could be expressed in the medium which it constituted.

Progress of Instrumentation

from the time of Beethoven onward, the art of instruments which Mozart had used, re-arranged according to Wagner's conception of scoring, form the setting of the "Meistersinger." The jolly horn of "Till Eulenspiegel" sounds far different from the romantic horn in Weber's "Freischütz"; and again the impressionist horns in Debussy's music are quite another thing. Since instruments, taken singly, provide such a wide range of possibilities, it is natural that the possibilities, it is natural that the possibilities, it is natural that the possibilities of among the composers, is also the from the time of Beethoven onward,

during that period: all the volces and timbres of the orchestra were conceived by composers as working in co-operation, and treated so as to merge, for the listeners' ear, into one "tone-compound." What listeners heard was, in the last resort, one melody with one background of chords or of harmonic accompanying patterns. Contrapuntal designs occurred as exceptions only. For the purposes of this harmonic music, the smooth Lalance of the traditional orchestra provided an altogether ideal medium. It not only held contrasts and timbers of the orchestra provided an altogether ideal medium. It not only held contrasts and timbers of the orchestra provided an altogether ideal medium. It not only held contrasts and timbers of the orchestra provided an altogether ideal medium. It not only held contrasts are conceived by composers as working in co-operation, and treated so as to merge, for the listeners' ear, into date. "The Woodlanders," on the Allegretto was distinctly original. On the other hand, Tovey's performance of the 33 Variations on a Waltz by Diabelli touched real grandeur. Elisabeth Schumann's song recital at Queen's Hall was one of those affairs when everything is delightful. It would be difficult to name another other singer whose art is so dewy fresh with happiness. To some extent this prevents her getting at the heart of sad songs. On the other hand, in Schubert's "Auf dem Wasser zu al handling becomes more selfand timbres of the orchestra were medium. It not only held contrasts of tone within it, but the very way in which it was constituted made it possible to reduce all these contrasts wated.

Walton and Lambert to a unity of some kind.

A New Ideal symphony orchestra. And in this re-

ers (including eight flutes and seven trombones) and who six years later instituted, in his "Chamber Symphony" for 15 solo instruments (10 styles in the four movements. wind and five blow instruments) the | Constant Lambert was represented wind and two blow instruments) the type of the modern chamber orchestry. But another 15 years were to settings of Seven Chinese Poems by

ously yet separately.

In order to achieve this end, it was necessary to decide upon this restriction of the number of instruments used—and, first and foremost, upon the number of the bow instruments: for if the setting comprises many of these, their tone will unavoidably send to blend and to blur the tone of the wind instruments.

orchestra. All the possibilities of the small orchestra are included in the full orchestra are included in the full orchestra; and at any time a graceful melody. A lyric mood incomposer, even within the bounds of one work, is free, according to his requirements, to detach from the main body a chamber orchestra of any dimension he pleases and to use this in contrast with the full orches.

Keeps it pretty well all through, so when the graceful melody. A lyric mood incomposer, even within the bounds of forms the Quartet almost as much chamber as much or demonstration of the dassociations they convey. It is not same question cropped up, my escale design, proportion, pointed out (in jest) that one thing pointed out (in jest) that one thing in fact or event they depict or of the associations they convey. It is not more difficult to draw attention to the colleague Richard Capell pointed out (in jest) that one thing in fact or event they depict or of the associations they convey. It is not more difficult to draw attention to the colleague Richard Capell pointed out (in jest) that one thing in fact or event they depict or of the associations they convey. It is not more difficult to draw attention to the colleague Richard Capell pointed out (in jest) that one thing may be said in favor of fancy titles:

"Half Moon Street" are more striking designations they convey. It is not same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropped up, my escale difficult to draw attention to the same question cropp in his "Wozzek." Moreover, by resorting to the chamber orchestra, composers have mastered the fundamental idea which small settings embody, and have learned to impart independence to the individual parts of the full orchestra.

It is extremely probable that jazz and the technique of jazz will affect the constitution of the symphony as to be almost a self-portraif. With I retorted that this was quite true, but that everybody knew that such names offered no inducement to believe that the one street was in the shape of a semi-circle, or that an herb could be gathered in the other. John Ireland's style, equally diabut for its groundwork, develops works may induce precisely this kind powerful shafts of harmony, and adds of absurd belief.

It is all very well to proclaim the

greatly increased.

Yvette of the Cathedral, chanting ancient hymns, impersonating saintly figures of the Middle Ages. I have known her playfully singing English musical comedy ditties in that delicious Franco-British linguistic mixture of hers. I have heard her frolicking in buoyant songs of the road, of the saddle, of the ship, and—hey as turned an archaic verselet of a medieval troubadour into heart-rending drama. I have seen her come presto!-rising to such tragic force ing drama. I have seen her come down from that exaltation as if in "volplane" to a song revelling in the joy of life, when Montmartre was a Parnassus and she all black-gloved arms and the willowy woman.

Another Personality Always she was Yvette, with that coruscating smile all her own dancing on the flawless ivory of her teeth, tripping from her undulating lips; with that sparkle in her eye that turned an auditorium into a venue lighted up à giorno; with those gestures of sculptured hands that, accompanying the speken or charted.

One has grown a little too accuscompanying the spoken or chanted word, told a tale twice over; with that exquisite, precise, yet never over-emphatic coinage of the word hat mattered.

But, as in Pagnol's comedy "Jazz," there stood behind the Yvette another personality, detached from the bonny, flounced, hoopskirted figure on the stage. This Yvette, unconscious of herself and of her surroundings, outlining in vocal inflections and in gesture the atmosphere of a former age, the prowess of heroes, the love-songs of balladmongers, the ecstasy of lovelorn women, singing of the heart that absence made grow fonder, of prayers that wafted across the ocean, of anguish lost in traffic far from nome, in commerce or war.

It is difficult to convey the magic

sition as well as in its effect. It is tion and one is amazed at the audacncomparable, not only because of ity and mastery that the harmonic its finesse but because of its abso-lute individuality. Herent and Baudin did their best with badly drawn parts.

Colonne Concerts

At the Colonne Concerts, we have been introduced to a tenor from the Berlin State Opera, José Riavez, who bears, as one sees, a Spanish name and who is actually a Jugoslav. He gave us fragments from the "Meistersinger" and songs of Richard Strauss.

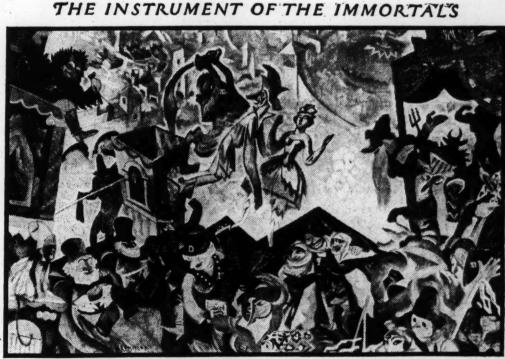

The Berlin singer, who possesses a of this art, which is unique in its technical and rhythmical compolight voice, agile and clear and of tact and intelligence, was warmly greeted. It is rare to see a tenor who possesses a vocal keyboard as clean equal and certain. There is not the heroic valor of lyric interpreters of the Kirchhoff type, but in finer and more transparent musical material, there is an interpretation of perfect

faithfulness and precision. At the same concert we had the first performance of a work by Vladimir Dyck, an excellent Russian composer who has carried on all his musical studies in France and was, at the Conservatoire, a pupil of the redoubtable and conscientious pro-fessor of harmony, Taudou. This work, written "upon the passing of two heroes," is dedicated to the mem-ory of Nungesser and Coli. It affects the form of a slow prelude, of which the simple, noble theme retains its rhythm till the end, causing sometimes repetitions that reflect its out-line in the manner of an imitation in canon. And the ritual pulsation of the semiquaver that one finds always in every funeral march comes in to veil this orchestral picture, in which there reigns a sincere respect, con-

emplation and emotion. The color of this painting is in the bass of the muted quartet, which, serves as a foundation sometimes for he gentle sobs of the flute, who enter two by two, sometimes to a horn or. muted trumpet. Occasionally a drum roll, leading in a rapid crescendo to an explosion of the big drum and clashing of cymbals, comes if one may put it so, to militarize the glory of the two eagles with broken wings. But it is only a fleeting allusion. Sadness again reigns over the orchestra. The violin solo cries like a heart that The entertainment had begun with choly, the viola and then the violon-

STEINWAY

"PETROUCHKA," painted for the STEINWAY COLLECTION by NICHOLAS REMISOFF

It is the opinion of many critics that Stravinsky has never surpassed his colorful ballet "Petrouchka." To them it expresses completely the striking personality of its famous composes Certainly the brilliance and originality of its scoring and the keen insight of its characterization set it among his undisputed masterpieces.

IN TEACHING a child to play the piano, parents and teachers are the first to recognize the susceptibility of the youthful mind and fingers. Yet frequently they feel justified in allowing him to practice on an inferior piano until they find "whether a Steinway would be worth while." By so doing they disregard the development of whole tonal sense . . . the very

foundation of his musical appreciation and expression. The rich, sonorous tone-quality

which distinguishes the Steinway has long been the acknowledged standard for pianoforte music among the musically informed. And it is this inimitable tone that has caused virtually every noted musician from Liszt to Stravinsky to choose the Steinway as the perfect medium for his art.

Yet children are often denied the influence of this tonal perfection because of the impression that a piano of such acknowledged superiority must be an extremely expensive instrument.

As a matter of fact you can have a Steinway grand delivered to your home today, for an original payment of only \$147.50 . . . a medium for your child's expression that will give a lifetime of perfect service and satisfaction. And there is the index of the true economy of a Steinway. . . . You need never buy another piano.

Upright piano can be bought for \$875

GRANDS \$1475 and up 10% down balance in

Radio Technical Consulting the technicians has the force of law, tries. be drawn up at Madrid in 1932. The Hague conferences were called by arrangement made when the 1927 radio telegraph convention was concluded in Washington.

> Radio "Block" System The "block system" of allocating frequencies above 6000 kilocycles was urged by the technical experts, and t was decided that all assignments shall be registered at the Berne Bureau of the International Telegraph adopted in lieu of the .2 per cent now in general use, so that the 624 chan-

6000 to 23,000 kilocycles are virtually doubled in number. One of the questions that arises under this arrangement is whether the Radio Corporation of America and the Mackay Radio & Telegraph Company, which respectively have about 65 and 40 frequency assignments on a .2 per cent basis, will suffer to lose half of their channels. They must be relicensed by the Federal Radio Commission, if it adopts the Hague plan, on the basis of .1 per

cent separation.

The conference recognized that Manchester, Eng.

There was a certain amount of disappointment felt that no television or telephoto demonstrations were difficult to maintain at mobile stations on ships or aircraft. inaugurated Westinghouse program orchestra and chorus, began his life and career in Naples, Italy, where at the age of 14, he conducted an orchestra at Severo. His own instru-ment is the cello, and when he first came to this country, he played the cello at Hammerstein's Manhattan Opera House, during which time he became a warm personal friend of Victor Herbert, himself a cellist. Some Surprises Promised In his work at the NBC this season,

Mr. Sodero promises many novelties, including the repetition of his own opera "Russian Shadows" which is going to be presented without cuts. This is the second time in the history of radiocasting that such an achievement has been accomplished. Authorities at the NBC last year thought it would not be a feasible plan to present a full opera, but Mr. Sodero proved by his first successful presentation, that it could be done with success. This opera, by the way, has been translated into German by Alice Mattulath, and is shortly to be performed in one of the large Ger-

by Helen Kellar, was performed at the Metropolitan Opera House in New York, as were "Prometheus," a symphonic poem, "Wedding March,"
"Chrysanthemum" and others.

"Chrysanthemum" and others.

"When my opera was performed," said Mr. Sodero, "I knew that I had an audience of 20,000,000 people and yet I never thought of them. I thought only of my work and I feel the same whether I am on the concert platform or on the radio. I feel that my leave the same whether is a concert platform or on the radio. I feel that my leave the same will be considered and will possibly be the center of lively debate before it is accepted, accepted in part, or given a five-year hoist—which latter, of course, means oblivion. 12 years' experience with the Edison

mitted by the Royal Canadian Com-mission on Radio Broadcasting, which would show that Government ownership and Government control mission on Radio Broadcasting, which suggests the feasibility of Federal Government ownership and Provincial Government control as a means of better development of radio. WORLD REVIEW OF BUSINESS AND FINANCE

Industry Plans Huge Expenditures—Rail Earnings Off-Stocks Quiet

The announcements of huge expenditures by almost all lines of industry in the United States have given sup port to business confidence this week In response to President Hoover's call for co-operative action toward stabilization of trade and industry railroads, shipyards, public utilities and other branches have promised a continuance of activity, with practically all leaders taking a highly constructive view of the economic situ-

This week's reports show some

Motor executives, however, state that the automobile industry has a good outlook. They feel that motor-cars have been removed from the lux-

cars have been removed from the lux-ury class, and that the trade is not-likely to be severely affected by the stock market decline.

Railroad earnings, as reported this week for the month of October, showed a decline from the corresponding month a year ago for the first time this year. Net for the first 10 months, however, is still well absed of net for ever, is still well ahead of net for like period of 1928.

Easy Trend in Credit

The sales outlook for the last month of the year is expected to show the effects of the stock market break to some extent, but, while the recession now being experienced in business mewhat more marked near future, it is thought that

in the hear future, it is thought that it will be of short duration.

The money market is increasingly easy, and this is considered one of the outstanding encouraging features of the present situation. Call money result in the content of the content with the co newed at 4½ per cent Wednesday, with funds reported 'available as low as 3 per cent outside the regular, market. Financing by bonds this week totaled \$15,706,000 compared with \$26,913,000 last week and \$60,999,000 in the Corresponding week last year.

Bank clearings amounted to \$10,372,806,000 this week, a drop of 5.9
per cent over the similar period a year

ago.
Car loadings, as reported this week, showed a decline from the preceding week, and from the corresponding week last year, but were in greater valume than in the like period of 1927.
Volume of business during the week ended Nov. 23, as measured by check payments and reported by the United States Department of Commerce, was substantially greater than in either the previous week or the corresponding previous week or the corresponding week last year. Wholesale prices con-tinued to decline, being substantially ower than a year ago.

Other Countries

JAPAN — The announcement that the gold embargo will be removed Jan. 11 has been received with much interest in Japanese financial circles, says a cable dispatch to the United States Department of Commerce. The Japanese Government is reported to have amassed specie reserves amounting to 320,000,000 yen and to have arranged for credit of 100,000,000 yen, in preparation for the lifting of the ban on gold exports.

Japanese foreign trade continues to improve.

SOUTH AMERICA-A slight in provement is noted in the Argentin business outlook as November draw to a close. Weather continues favor

able to crops.

Little improvement is reported trade conditions in Brazil. Money A slugglish condition is reported in merchandising in Chile, but the situ-ation for leading industries continues

satisfactory.

Peruvian trade remains dull.

Uruguay is looking forward to tourist traffic, with business feeling the effects of recent depression. Bolivian business has been adversely

affected by developments in the tin industry. The low price of this metal is expected to result in the closing of several mines.

MEXICO—Mexican trade trends are toward improvement, and the general feeling there is fairly cheerful. Some crops are reported as below normal, due to drouth. Development of banana lands is taking place in Vera Cruz. Mining and petroleum industries continue unsatisfactory.

Leading Stock Markets

Business on the exchange progressed in a normal manner. Price movements for the most part lacked the spectacular features to which traders have I accustomed. An aggressive drive come accustomed. An aggressive drive against copper shares developed Monday, based on the view that the price of the metal could-not long be maintained at present high levels. Selling pressure was later directed against pivotal issues, but the market closed for the week on Wednesday afternoon with more of the list showing moderates. for the week on Wednesday afternoon with most of the list showing moderate advances over the previous close. Brokers' loans declined for the sixth successive week. A drop of \$137,000.000 reduced the total of these loans to 33,450,000,000, the smallest in two significant specific provides the smallest in two significant specific provides as follows:

| Bomday | 1/2 Vienna | 8 | 8 | 1/2 Vienna | 1/2 Vienna | 8 | 1/2 Vienna | 1/2 Vien

years.

The London stock market has bee

steady tone.

The week on the Paris Bourse wa featured by a sharp decline Wednesday, and the outlook for end-of-themonth settlements took on a doubtful aspect for the time being. The market turned about Thursday, however, and while gains were not sufficient to wipe out losses in all cases, the situation was much improved.

The early part of the week on the Berlin Boerse was featured by a down ward trend, but a brisk advance wa staged later, and gains up to 10 point

FALL RIVER CLOTH MARKET MORE ACTIVE

FALL RIVER, . Mass. - Increased buying of narrow printcloths by printers contributed largely to making this one of the best weeks in the local cloth market in some time, in spite slackening in industry, due mostly to curtailment of operations by steel mills. Automobile manufacturers are not yet buying steel. practically absorbed the available sup-ply of certain 27-inch goods which had been dormant for months. In the 36-inch constructions, price

concessions of an eighth of a cent on some numbers were reported, although full prices were asked generally and resulted in a fairly good volume of Wide and narrow odds sold a little

Wide and narrow odds sold a little better than during the previous week, with prices remaining unchanged. Trading in the relatively quiet sateens was generally confined to 4:37s at 11 and 11½ cents, Bids of 10 cents for 4:70s were frequently re-ceived, but the mills passed up busi-ness rather than sell for less than 10½ cents.

Against this is to be set a further quieting in industry, which as usual apparently prefers to meet the inventory period with reduced supplies of goods and materials on hand.

Retail trade, with which is naturally linked holiday, buying, has made a rather encouraging step forward. With colder weather and snow described as helping the movement of heavy clothing, shoes and women's wear of various sorts in wider than normal areas. Stress is laid more frequently in the reports on the evidences of staple goods selling relatively better than so-called luxuries, fur goods being frequently mentioned as tending to drag, although jewelry trade reports show up perhaps better than some others.

Inquidation Continues

The stock exchange in the last week was troubled by the re-emergence of diguidation, not heavy but persistent and finding little resisting power in the markets. Permission for resumption of trading in Drapery Trust preference shares was seized on as the straighle sign of progress in straightening out the Harty tangle, and supporting unofficial views of the mossibility of the main settlement earlier than was expected at first. It is believed that failures due to that settlement will be avoided in London, but some provincial houses may go.

With the New York Stock Exchange in Parliament on the national debt on Monday was shown subsequently to be a way and substitute of the lack of an earlier opportunity for many labor ministers to acquire the traditional reticence by experience of office.

The remarks were never taken seriously. In the gilt-edged markets the stocks were put down initially as a precaution against foreign sales, but they were put up again cautiously. at least three was a precaution against foreign sales, but they were put up again cautiously. at least three was a precaution against foreign sales, but they were put up again cautiously. at least three was a precaution against foreign sales, but they were put up again cautiously. at least three was a precaution against foreign sales, but they were put up again cautiously. at least three was a precaution against foreign sales, but they were put up again cautiously. at least three was a procaution against foreign sales, but they were put up again cautiously. at least three was a procaution of the canadian National Preferaginal Company, which was unusually centered on home affairs. Cabinet Minister Shaw's speech was unusually centered on home affairs. Cabinet Minister Shaw's speech and the caption of the Canadian National Telegraph Company and the Caption of the Canadian National Telegraph Company and the Caption of the Canadian National Telegraph Company, which was unusually centered on home affairs. Cabinet Minister Shaw's speech

nat the company is not now in-erested in Horne's bankruptcy to any considerable extent but the whole in-cident is an unpleasant reminder that the consequences of the emission of much trash in last year's boom have not yet been completely eliminated.

Position of Tin Doubtful The most difficult Paris settlement

for some months was respo a weak tone in many oil and mining shares. Rubber was idle.

There is considerable disappointment at the position of tin. The metal was firm before the long-awaited meeting of the British producers. But there was a heavy drop on the vague program emerging from the meeting and it is believed that there will be no and it is believed that there will be no restriction of output by the producers but rather, efforts to control supplies from the smelters. If so, money will be required to finance the supplies held off the market, but the Tin Producers to the supplies have the transitions have restricted. ducers Association has no ducers Association has no capital. The question now being asked is, Will the British-American Tin Corporation with £1,000,000 capital step in? Clearly no immediate decisive action is possible since the support of parished the Datable interest in

and the Dutch interests

Intercollegiate, Club and Professional Athletic News of the World

HAINES WINS FROM LARIGAN

Captures United States Fall Squash Tennis Title at N. Y. A. C.

NEW YORK-Rowland B. Haines of the Columbia University Club, the United States squash tennis champlon, scored his first victory in an autumn tourney Friday, after four years of attempts, when he defeated Edward R. Larigan of the Crescent Athletic Club, in the final round of the United States fall scratch tourney, Friday, at the New York Athletic Club. The score was 15-8, 15-2, 7-15, 15-12, and the match ran exactly 50 minutes.

Larigan has been the winner of this event for the last two years, while this is the first time that Haines has been able to get even to the semifinal United States squash tennis champion,

been able to get even to the semifinal round. But this time the champion has reached his finest peak earlier than usual, and his playing Friday, and in fact, all through the tournament, was fully up to his best standard. Larigan, on the other hand, except for a brief period in the third and the start of the fourth game, was far below the skill. ourth game, was far below the skill he showed earlier in the week, and

Rallies Are Short

Both displayed a skill in placement that put them far ahead of all the other stars, and with both depending largely on their power of stroke, the rallies were short and the errors few. Haines, when at his greatest peak, was better on attack using a mysture of better on attack, using a mixture of shots which had Larigan puzzled to snots which had Largan puzzled to meet the varied change of pace, nick shots for the corners, and powerful wallops that were woven into a per-fectly balanced game by Haines. But whenever Larigan forced Haines from his attacking was into defending play. s attacking pose into defensive play, was also able to score with the aid he was also able to score with the aid of his backhand shots around the court, which ran rather lower than those of Haines, scoring many placements when Haines was unable to reach them before the second bounce. Both were hardly at top speed at the start, and there was little to choose between them for the first few innings.

between them for the first few innings. But Haines' dexterous use of his wallop gradually enabled him to work ahead, and finally he ran out the game with a final series of placements that traveled up and down the court like bullets. This seemed to discourage Larigan, and the second game found him making hardly an effort to get the drives of the champion. This gave Haines a chance to ease off somewhat, and only an occasional wallop testified to his power. Even the deciding point to his power. Even the deciding point came on a slow ball drop shot that stayed in forecourt, well out of reach

stayed in forecourt, well out of reach of the Crescent player.

After Haines ran up a lead of 4—0 in the third game, Larigan was heard to say "Let's go," and he went to work in real earnest. The next half a dozen innings saw some of the finest squash of the match. Haines was displaying every shot in his reportury, while Larie. of the match. Haines was displaying every shot in his repertory, while Larigan was also making every stroke tell. But these tactics by Larigan gradually forced Haines on the defensive, and though Haines held his own to some extent, Larigan took the game in the eleventh inning, with the aid of his low shots, which forced errors by Haines.

Vigorous Attack

Larigan also started the fourth game with a vigorous attack, and ran the score up to 6—0, with five placements in a row, all different, but that burst of speed brought his chances to an end, as Haines, now thoroughly aroused, boldly attempted to take the offensive once more, and using his wallops and change of pace with great the New Moon star, at 6—7. The next half dozen innings found Larigan using every bit of his skill to halt the onrushing champion, with fair success, until the score stood at 11—5 in his favor. But another series of wallops by Haines soon placed him ahead, and Larigan slipped once more into errors, bringing the match to a close. The summary:

UNITED STATES FALL SCRATCH TENNIS TOURNEY—Final Round Rowland B. Haines, Columbia University Child, defeated Elward R. Larigan, Child, and the content of the Conference standing the content of the Confere

System Is Tried Out

New York

THE new system of scoring recently devised by Glenn S. Warner, to do away with ties and inconclusive games, failed to impress the onlookers at its first test n an actual college game. From the viewpoint of the majority of the spectators at the event, in which two minor colleges, Brooklyn City College and Long Island University, played according to the new system, at the Lewisohn Stadium of the City of New York, there was little difference, except for the novelty of seeing the score change from time to time as one team or another scored a first down and obtained a point for so doing.

normal score of 12 to 6, with a possibility of two points after touchdown for the winners, and one for the losers, made no variainnovation that really appealed to the officials and players was the between halves, by which play was resumed at the point where it left off, instead of starting the game all over again. This is likely to be adopted by the rules committee. The elimination of the point after touchdown, another of the was mostly disapproved, as tending to eliminate one of the few cases where a kick is effective with two few chances for that part of the game already.

Even its advocates agreed that the change should not be made two first-class teams.

DENVER (P)—By scoring two touch-downs against Colorado School of Mines, Thursday, Clark of Colorado College closed his gridiron career as the leading individual scorer of the Rocky Mountain Conference with 68 points, 14 points ahead of Pomeroy, the Utah University fullback.

RICHARDS IS ENGAGED BY CLUB NEW YORK (P)—Vincent Richards, former United States Davis Cup tennis star, was engaged Friday to serve as club professional at the Norwood Country Club, Long Branch, N. J., for the summer season of 1930.

CBY-PLAYS

A Scholar and a Football Player

Southern Conference student who is proving that it is quite possible Southern Conference student who is proving that it is quite possible to be a good scholar as well as a good football player, is F. W. Sington '31, guard of the University of Alabama, and one of the youngest members of the team. Not satisfied with being one of the highest ranking scholars at the University, Sington has gone out and won new honors on the gridiron. Southern critics describe him in superlative terms, declaring him to be the best Conference lineman of the last 10 years. Sington has not only distinguished himself in defensive rôles, but comes out of the line to lead the interference, and also does the kicking off and kicking of points after touchdown. In the spring, Sington manages to find time enough from his studies to be the leading pitcher, hitter and first baseman on the baseball squad. Alabama's great young athlete has declined several "big league" baseball and football offers in order to complete his courses at Tuscaloosa.

Jug Has a Double

Doubles for movie stars in risky situations are familiar, but a double for a football trophy is something new. For many years University of Michigan and University of Minnesota have played football for the possession of "The Little Brown Jug." Recently, when Michigan won the prize at Minneapolis, the jug's double was turned over to the Wolverines after the game. No deception of Michigan was involved. The substitution was agreed upon in advance to protect the traditional trophy in case the crowds swarming the field became obstreperous and tried to do things and go places with the jug. The real jug is to be carefully crated and expressed to Ann Arbor.

Auto Helping International Sports

The increasing vogue of automobile touring has led to unusual developments in sports all over the United States, and now the leading resorts over the border on both sides are adopting tactics to draw this class of spectators also. Recent reports from Aguascalientes Indicate an ambitious program to draw the California-bound tourist over into Mexico, in tennis, golf, and other warm-climate sports, and now the Canadian resorts, not content to depend on one week, are branching out by building special automobile roads, and arranging for week-end programs for practically all winter.

winter. Banff, Alberta, has just announced that by co-operation with the Canadian Pacific Railway, it has arranged for weekly ski meets up on the sides of Mount Norquay, at a new camp which has been established and connected with the town by a road that is, for the first time, easy enough for automobile traffic. This is in addition to the annual carnival, set this year for Feb. 1, which includes swimming meets outdoors, in sight of snow-covered mountains, due to the warm springs.

Weissmuller's Racing Start

Weissmuller's Racing Start

One of the secrets of technique revealed by John Weissmuller in his forthcoming book, "Swimming the American Crawl," to be published by the Houghton Mifflin Co, of Boston in the spring, concerns the racing start that sent him on the way to more world's sprinting records than any other swimming star-ever compiled. To the uninitiated, his start does not appear to differ from that of his rivals, though he gets off his mark slower. He explains that he leaves his mark slower because he makes more preparation, and thereby plunges farther in a shorter space of time. Also, he plunges shallower. To prevent making a deep plunge he raises one leg, and raises both arms high in front of his head as he sails through the air. Just as his face and body hit the water he brings his arms and leg down with a smart whack. This keeps him up high, and he not only skims along the top of the water, but easily gains the hydroplaning position from which he starts the crawling action of the arms much sooner than can be done by his rivals who go deeper. his rivals who go deeper.

Page Professor Dickinson

Now that Prof. Frank G. Dickinson of the University of Illinois has proved by his system of figuring that Purdue University has won the "Big Ten" football championship, the Pacific Coast Conference might, call him in to figure who has won its championship. Four of the teams are sure to finish the season undefeated, and in addition to this Southern California defeated Stanford 7 to 0, then California defeated Southern California, 15 to 7, only to be defeated by Stanford, 21 to 6. If Professor Dickinson's system can untangle this championship to the satisfaction of all concerned, it will be the concerned of the c can untangle this championship to the be the most successful one yet devised.

1 1 1 How About the Other Improvements?

Those persons who are saying that records made when starting blocks are used should not be accepted as against those which have been previously made without them, because they give the athlete an advantage, should not forget that most of the present records were made largely through improvements in athletic equipment. How about the spiked shoe, the wire handle in place of the stiff handle for the hammer, the metal shot instead of the old leather-covered one, the pit for the pole in the pole vault, and the improved takeoff for the broad jump?

LONDON (P)—Henry C. Cotton, coungest member of the British golf eam—which took the Ryder Cup from team—which took the Ryder Cup from the United States professionals, plans to exhibit his golf in Argentine this winter. He plans a three months' visit, beginning n December, playing in competitions and taking part in exhibition matches. It is understood the purpose of Cotton's visit is to stimulate the already pronounced golfing interest in the republic, and is due to the generosity of two wealthy members of the Argentine Club. It will be Cotton's second overseas tour.

GUAM (P)—Sailors of the United States Army transport Chaumont defeated the team of the transport Henderson, Friday, 6 to 5, and won the baseball championship of the transport fleet. Among the spectators were Chamorro natives, who are enthusiastic fans of the American game.

IDAHO ELECTS H. E. BERG POCATELLO, Ida. (P)—Howard E, Berg '32, halfback, will captain the 1930 University of Idaho football team. He was elected at the University Club din-ner here on Friday.

Who: SIR HENRY RAWLINSON

Why famous: An English soldier

and orientalist, famed as the deciph erer and interpreter of the Behistur

Rock. Born in Oxfordshire, his early years were probably of a pattern with those of other lads; then suddenly a door swung open and admitted him to a world of antique mystery. For he went to Persia and there became absorbingly interested

there became absorbingly interested

in a relic of the reign of Darius, the Great King.

Rising beside the old road which

led from Babylon to Ecbatana, is a

precipitous rock, and upon it an elab-

orate inscription, placed there by Darius to record the manner of his

gaining control of his kingdom. For nearly 2000 years no man had been

able to read the inscriptions, which

are in cuneiform or wedge-writing

save only one German school teacher

who, in 1802, had deciphered a few

words and names in the Persian in-

scription. So Rawlinson, a clever and a brave man, tried what he could do.

The three inscriptions, in the cuneiform writing of Babylonia, Persia and Susa, are 500 feet above the ground, where, at the foot of the

plete alphabet of the old Persian

cuneiform, with its 39 phonetic signs,

Susian and Babylonian characters.

The result is that scholars are now able to recover the lost language and history of Babylonia and Assyria as

Where Parity Becomes Fallacy

LTHOUGH it is denied that Count Manzoni, A the Italian Ambassador to France, has presented an official note to Aristide Briand, the French Foreign Minister, and it is understood that he has merely left a memorandum of a personal character, it may properly be assumed that Franco-Italian naval negotiations have begun. The issue, as it is put with unwarranted sharpness, is that France must concede naval parity to Italy or Italy will refuse even to discuss the possibility of reaching an arrangement that will afterward be adjusted to Anglo-American propositions.

The outlook is, however, far more promising than is implied in the account of the preliminary exchange of Franco-Italian opinions. If the claims were taken literally, there would be poor prospect of an accord and the London conference might end in failure. But happily it is beginning to be seen that while parity was for special reasons the word which helped to unlock Anglo-American problems, it is a false key, which will only render the Franco-Italian lock less workable. Why parity of ships, unless there is parity of needs? Why should any power want superfluous and merely ornamental battle craft? Why introduce into international life the amusing domestic ambition of keeping up with the

It is a simple question of fact, which can surely be determined with some finality, whether for normal purposes France requires a greater or lesser number of vessels than Italy. It is urged that, while Italy chiefly concentrates its interests in the Mediterranean, France, with Atlantic and Mediterranean coast lines and Far Eastern possessions, must maintain a relatively larger fleet to protect itself and its lines of communication. If this contention be true, then the Italian demand for strict equality is presumably based either on anticipation of war with France or a foolish desire to keep up with France at the cost of building useless ships.

It is quite unnecessary, and indeed premature, to pronounce judgment. Italy has the opportunity of showing that its national needs approximate those of France. But it is well already to look the alternatives in the face and definitely deprecate talk of parity for parity's sakeparity which is based upon no essential similarity, but rather upon emulation. It is not by way of parity that France and Italy should approach the conference. Each should state its needs without regard to the other. Then each should ask whether its concrete program is offensive to the other, and make such adjustments as will allay mistrust. Obviously, each will regard the other's program with very different eyes if they consider themselves friends or if they consider themselves potential enemies.

That possibility of future antagonism does, indeed, sometimes seem to be at the bottom of the plea for parity. It is at the bottom of the ingenious scheme which is known as the "Mediterranean Locarno" and which consists of a British promise to keep the French Atlantic fleet out of the Mediterranean. The British would naturally object to playing policeman and becoming involved in a hypothetical Franco-Italian conflict. But why should anybody in France, Italy or Britain assume that such a conflict is likely? If it is believed that common sense, the League of Nations, the Kellogg-Briand peace pact and growing world opinion are sufficient, as surely they are, to maintain Mediterranean peace, then no Franco-Italian naval difficulties

Parity which does not correspond to reality, which is not built upon natural needs and which is a synonym of jealous artificial prestige is certainly fallacious and may prove mischievous. It should be rejected from the Franco-Italian naval vocabulary, and whatever discussions there may be should be about genuine respective

The Risks of War-of Peace

WHAT a sad but instructive scene as the S. S. President Roosevelt, piercing the dull mists of New York harbor, bore reverently to the shore of the United States the remains of seventy-five American soldierssoldiers who made the supreme sacrifice in the vicinity of Archangel, Russia, in 1918 and 1919. Today, some of them unidentified, they receive full and resplendent military honors. An American destroyer is escort. Wreaths of poppies deck the ship. "Taps" announce when American soil is touched. It is well. All reward is due them. The Nation is grateful.

Sad but instructive it is, however, for these American soldiers sacrificed themselves not in the common cause, but in a war that was never declared and against a government that was never even recognized. Russia had concluded a --parate peace. The Allies, endeavoring to reconstruct the eastern front, entered Russia's civil war and cast their lot with the White Russians. For months, even after the armistice was declared and other troops were homeward bound, American, English, French, Italian, Serbian and White Russian forces battled the troops of the Bolshevist Government in a purposeless campaign.

Some time history may allot the blame. It will fall on no individual. Perhaps it was one of the inevitabilities of war, one of the contingencies

against which military enterprise cannot prepare in advance. But may this incident impress the world with one lesson! It is a lesson in the art and science of peace. Peace, too, has its risks, but let us not condemn peace plans and peace commitments because they do not provide a ready-made solution for every imaginable contingency which the mistrust of the jingoist can conjure.

No Heat Over Antarctica

APPARENTLY the diplomatists refuse to become heated over antarctica. At least there is little warm American impetuosity about the State Department's reply to Great Britain's note concerning sovereignty in the chilly regions near the south pole. Of course, the department only waited until the eleventh month and the twenty-ninth day to make answer, but since the gist of its response-so far as the public is permitted to know-is merely a courteous "thank you" for London's expression of interest in Commander Byrd's activities in "the Ross dependency and the Falkland Islands dependency," it has hardly laid itself open to any criticism on the grounds of undue haste.

Quite rightly, doubtless, the department maintains a frigidly impartial and noncommittal attitude by refusing either to concede or deny implied British claims of sovereignty over various antarctic areas enumerated in the note of Nov. 17, 1928, "Enderby Land, Kemp Land, the area which lies to the west of Adelie Land . . denominated Wilkes Land, King George V Land, Oates Land"—with so many lands and most of them only undefined chunks of ice, who is the State Department to say where sovereignty ends or begins-in eleven months and twenty-nine

It is a question for centuries, yea æons, this matter of deciding whose land-if any-rests under the vast unexplored portions of antarctica. Did the man who first sighted the continent thereby acquire title for his home country? Or should he have landed to make possession secure? Or doesn't landing count unless he planted a flag? Or did he have to make surveys? And how far do discovery rights extend? As far as the land-or ice? Or only as far as the discoverer could see on a foggy day? Or must he have explored every bit of the region claimed? And-by the way-who was this first

Amusing as the question may be, it has a serious side. English, French, American, Russian, Norwegian, German and Swedish nationals have made discoveries in the antarctic region. Commander Byrd with his airplane mapping has added thousands of square miles to the explored area and named Marie Byrd Land and the Rockefeller Range. Moreover, his geologists have shown that the "bottom of the world" contains mineral deposits which may become of great value. It is no time for hasty allegations or denials of ownership. Antarctica cannot be allowed to cool the warmth of Anglo-American friendship.

Paintings for Everybody

THERE is undoubtedly a certain incongruity between the prices modern painters often demand for their pictures and the low estimate which apparently both the public and the art dealers form of them. How is this disagreement to be smoothed out? How is a market to be found for a large number of modern pictures which from time to time make their appearance on the walls of public and private galleries, only to disappear again, and perhaps for good, because neither the public are willing to pay the prices demanded for

A solution was offered some time ago by G. Bernard Shaw, who advised painters to sell their pictures at a uniform price, not above the buying capacity of the wider public. But Mr. Shaw's figure of £5 met with little response from the artists in England. And no wonder. For, to judge from an interesting account of the economics of painting which recently appeared in an English paper, the sum of £5 would not only leave the painter with no profit, but would probably entail some loss.

The modern artist, it is pointed out, has to spend about £4 on the painting materials of a single picture. In addition, there is the model to be paid for, or, if the picture is a landscape, the railway fares. Finally, there is the expense of exhibiting it to the public. Indeed, it appears that even if Shaw's figure is doubled the painter would still fail to make a living out of his art. For, as a simple calculation will show, even if he be so prolific with his brush as to produce one picture each week of the year, he would only earn, after deducting his costs, about £260

This, in brief, seems to be the case against the proposal of a small uniform price for paintings. It may also be doubted whether, as is apparently seriously suggested, in absence of financial reward painters should agree to be satisfied with the pleasure they find in their

Admittedly the path to fame in the world of the brush and palette is both steep and narrow, but is it really impossible to fix a figure for an oil or water-color painting that would provide the painter with a reasonable profit and at the same time enable the public to buy original works of art on a much larger scale than it

Good Government Grows in Dry Soil

TETEORIC is the word that fits the rise of IVI good government in Cincinnati. It is less than twenty years since "Boss" Cox sat there on his political throne. The machine he controlled was powerful in the State and a factor in national politics. Cincinnati was discouraged. The throne crumbled and the machine faltered. Recently at the National Conference on Improving Government, Cincinnati was credited with the "most wholesome governmental situation in an American city.

A brilliant city manager, a strong Mayor, an intelligent and representative City Council, and a continuing civic organization defending its gains are outstanding causes of the "Queen City's" fresh impetus. Citizens who demanded a change—and got it—did not stop there. Civic vigor was maintained. Men and women of national prominence participated in local public affairs, and have kept on participating. What Cincinnati first won for better government, it protected at its recent election.

It detracts nothing from these necessary elements of municipal success to point out another new constituent of the Cincinnati situation—better soil for good government to grow in. When "Boss" Cox ruled and later, Cincinnati was the headquarters of the National Wholesale Liquor Dealers Association, which broadcast antiprohibition propaganda on a large scale. It was the seat of the Personal Liberty League, spaciously housed, which also acted as a voice of liquor. It was the headquarters of the brewery workers' union exerting a similar influence in labor circles. It was the home of the most militant of the brewers' state organizations. It was the center of the last great drive of the combined brewers and distillers against the extension of state-wide prohibition. Liquor capital and labor had a national headquarters in Cincinnati. Alcohol was in the atmosphere. The city was lethargic. Under prohibition the atmosphere has cleared. Liquor and machine politics have evaporated together.

Good government has wonderfully flourished of late in Cincinnati; it has not had liquorsoaked soil to grow in.

William Gillette, A. D. G.

THER times, other manners-but the human factor remains constant. That is why many persons in the audiences that are witnessing William Gillette's revival of "Sherlock Holmes" have a pleasanter evening than ever they did thirty years ago when the play was new. They do not attempt to deceive themselves about the failure of this detective drama to hold all its original colors unfaded. With the new generation they could admit that the dialogue is often artificial, that the machinery for making the thrills is often ponderous, that the characters surrounding Sherlock are but moons, adding to his radiance by reflection. They accept the play for what it is, a flavorsome antique, though an antique, priceless of its sort, a souvenir of that almost forgotten era of playwriting, the day of Scribe's well-made play that Ibsen, Shaw, Barrie and Tchekov ended by letting fresh air from all outdoors into the musty theater.

That "Sherlock Holmes" as a play is obsolescent, even when it has received the artful production and acting of the present revival, matters not at all. It is good to see the play again for its own sake, if only as a museum piece. Above all it is good to see William Gillette's melodrama again because it brings back. for those who saw it long ago, the memories of another day. It is one of the happy faculties of pleasant happenings of the past to jump vividly into new life in the book of remembrance when something recalls them, while unpleasant memories remain vaguely dormant.

This revival brings before audiences new and old a personage, William Gillette. That this artist expressed himself according to the best practice of the theater of thirty years ago when with Sir Arthur Conan Doyle he wrote "Sherlock Holmes" is something that cannot be taken away from him by a 1929 judgment on his play. In its day it was a masterpiece of melodrama, and today its polished craftsmanship should be a standing rebuke to slovenly writers as well as to persons with incomplete knowledge of the mechanism of theatrical

William Gillette of 1929 is a finer artist than was the William Gillette of 1899 when "Sherlock Holmes" had its first performance. For the years have but added to the store of his experience, and ripened the urbanity of his viewpoint. Art is expression, but expression is not art, says Croce. This paradox explains why the Gillette of today is a greater artist than was the Gillette of a generation ago. The form in which he then worked expressed him then, and yet that form has become outmoded. But the man has gone on, so that today he expresses his personal nature as of 1929, and that nature is not outmoded. Thus we are witnessing in his present performances the revelation of a sensibility, a wit and a kindliness that are of the artist himself. To him we should like to offer the degree of A. D. G., meaning William Gillette, actor, dramatist, gentleman.

French and Germans—A Comparison

By SISLEY HUDDLESTON

remembering the talk of a special understanding with France and the creation of a United States of Europe, I endeavored to draw a comparison of the French and German political mentalities. In this I was greatly helped by a conversation with a distinguished German who had worked out an ingenious contrast between his compatriots and the French. I believe that stress should be laid on the fundamental resemblances of peoples; but I also believe that, when due allowance is made for the falsity of all generalizations, it is sometimes helpful to try to understand differences.

In what follows there is no wish to be dogmatic. It may be that the distinction which is drawn is not so sharp as it would appear to be. But there is, nevertheless, some substance in the contention that, while the Frenchman is chiefly interested in the French soil, the German is chiefly interested in his countrymen. One thinks in terms of race, the other in terms of territory. 1 1 1

The history of the two nations has run on divergent lines. While France early took shape, and, in spite of a vast variety of origins, a considerable intermixing of blood, traced its boundaries, and became, as a country, homogeneous, Germany, united by racial ties, sprawled, an amorphous mass, across Europe. Germany was not a nation as was France; it was a conglomeration of several hundreds of little states. It was only a few generations ago that it was clearly defined on the map, whereas France, if its contour has necessarily changed in the vicissitudes of the centuries, has nevertheless preserved an unchanging consciousness of its natural limits.

Thus it comes about that France is a geographical while Germany is a racial unity. France is concerned in keeping France. Germany is concerned in keeping Germans.

If a parcel of land has once belonged to the French and has been truly accepted as French, then the French cannot bear to lose it. Alsace formed part of the ideal France, and when it was taken from France in-1870 the desire for its return burned strongly in the breast of every patriot. It is not that the people of Alsace are peculiarly French. It is that Alsace itself is peculiarly French.

There is doubtless some exaggeration in the epigram that were Alsace to be peopled by a colony of Chinese it would still be, in French eyes, French. There is some exaggeration—but not much. For the French live under the old Roman laws of property, and have a strong historical sentiment. France rapidly absorbs foreigners—a phenomenon which has been frequently remarked uponbecause residence on French soil is somehow held to give French nationality. 1 1 1

Poles and Spaniards, Italians and Czechoslovakians, are welcomed. They are freely admitted into the French family. They soon become more French than the French. They never feel themselves a minority. They are not kept apart from the rest of the community. I have often seen, in the Chamber, black deputies from overseas possession arm in arm with white deputies. The colored men would be shocked at the suggestion that they are not true Frenchmen, while the white deputies would be equally shocked were it suggested that their Negro brethren are different from themselves. The color line is not drawn in France, because the only French test of nationality is the occupation of French soil.

That is why France is the most hospitable country in the world. A Frenchman could live all his life in England and never be recognized as English; but it seems impossible to live long in France without acquiring something of the French character. For the French, the Frenchman an end.

ECENTLY I was traveling through Germany, and | abroad is an anomaly. He is queer and inexplicable. He is not French unless he is in France. The French expatriate, and even the French traveler is looked at askance by his countrymen.

Exactly the opposite sentiment prevails in Germany. Nobody can cease to be a German. Nobody can become German by adoption. A few exceptions—such as Houston Stewart Chamberlain-may be cited; but they are so rare that they cannot invalidate the rule. Germany, for special reasons, may have proceeded to conquer other lands, but it has never succeeded in making Germans of alien populations.

The Poles, for instance, under Germany, remained Poles, Partly this may have been by reason of the Polish temperament, but chiefly it was by reason of the inability of the German to accept the Pole as a compatriot. Frenchmen could accept the Pole as a compatriot, but Germans

never. Racial feeling is greater than territorial feeling.

It follows that the territorial losses of Germany in the beacemaking would not in themselves trouble Germany overmuch. It could, if that were all, forget its humiliation. It could, from the economic viewpoint, be content with suitable contractual arrangements. It will never brood over Alsace as France brooded over Alsace. The soil may be necessary as a means, but it is not an end. The French peasant has a veritable passion for the soil; and the French Nation has a veritable passion for territory. But the German is essentially interested only in his brother

In his brother Germans, however, he is irrevocably inerested. Their sorrows are his sorrows, their joys are his ovs. He yearns over them when they are forced under a foreign yoke. He will never be disinterested in their fate. If there is a German minority in Poland, Germany will always remember that minority. It will always champion the cause of that minority. The fatherland is an expression that brings tears to the eves of the sentimental German, but were he to analyze his sentiments, he would discover that he is not thinking of the fatherland at all, but of his fellow Germans. His conception of Germany is more human than is the Frenchman's conception of France. The Frenchman glorifies an imaginary personage whom he calls France. The German has a vision, not of an imaginary entity, but of individual Germans.

I remember Norman Angell's telling me of his travels in South America. Everybody spoke Spanish, and Angell had difficulty in making himself understood. In a restaurant he exclaimed: "Can nobody here speak French or English?" Instantly a husky Negro stepped forward and said: "Moi, je parle Français!"

Angell looked at him in some astonishment. "How do

you come to speak French?" he asked.

And the Negro, drawing himself up proudly, beat himself upon the breast and declared: "Mais je suis Français pur sang" ("I am a Frenchman of the purest blood").
No Frenchman would see anything surprising in this Of course the Negro, born in some French island, would be, for the French, French. But the German, as a colonist, failed to assimilate the native races. He did not think of them as German.

This is not a criticism either of the French or of the Germans. It is simply a little study of their respective characters. In European diplomacy the French are moved by the wish to obtain territorial security-to enjoy the status quo. The Germans, in their relations with their neighbors, are moved by racial affinities. But there is nothing that should prevent them from settling down on terms of peace and friendship. There remains nothing which should revive the age-long feud now happily at

From the World's Great Capitals-London

London THE change which is gradually overtaking the mode of life of the present-day inhabitants of London is, perhaps, best illustrated by the growing popularity of flats. In the older suburbs, especially, the new habit of living in flats has almost entirely displaced the older custom of one family occupying a whole house for itself. The houses, it is true, are mostly the same Georgian pillared mansions or Victorian red brick two or three storied buildings, but the greater number of them are really divided up into flats, and the house that once upon a time contained only one family, that in many cases lived in it for several generations, today contains two or three families that rarely remain in it for more than a few years.

This tendency to adopt the more gregarious habits of American and Continental cities is particularly observable in the newly built large blocks of flats, which are springing up almost everywhere in the West End of London, from Baker Street to Park Lane and from Bloomsbury to Piccadilly. The first to be ready for occupation have been, however, the luxury flats in Park Lane and Piccadilly, for which it is apparently proving difficult to find tenants, partly because of the high rents of between £1500 to £2000 a year, and partly because of the servant problem, which such flats, owing to the attached restaurant, are supposed to have solved, but which apparently still clouds the domestic felicity of their rich occupiers. The cheaper flats, however, are being rapidly made ready for occupation, and in a few years even the residential parts of London may be expected to become as unrecognizable to the tourist, who is anxious to revive old association, as many of the commercial centers of the West End.

It is interesting to note that the Savoy Theater claims to have been the first to institute the queue system for unreserved seats. Until the theater opened in 1881, might had been right, and disgraceful scenes of disorder occurred nightly at the pit entrances of the West End theaters. Today, every seat can be booked. In addition, the approaches to the doors to all parts of the house are entirely protected with an attractive glass canopy flooded with ight from box lights placed at frequent intervals to form part of the design. In the approaches to the Savoy Hotel lying contiguous with the theater, another daring experiment has been tried. The façade of the covered courtyard under the imposing statue of the mailed Savoyard, as well as part of the walls of the approaches, have been sheathed in stainless steel. This, in conjunction with the glass canopy over the sidewalks, gives a most striking effect. It will be interesting to see how the stainless steel withstands the sulphurous attacks of London's celebrated atmosphere. 1 1 1

A symbol of international reconciliation is seen in the coming South African dinner here, where General von Lettow-Vorbeck is to be the guest of honor and Gen. Jan Christian Smuts presides. The former commanded the German forces in East Africa during the Great War. The latter fought against England in the Boer campaign of 1901, yet led the British armies that faced General von Lettow-Vorbeck in 1917. The invitation to attend the dinner which General von Lettow-Vorbeck has accepted, was sent with the warm approval of a number of distinguished British officers, including Admiral King-Hall, Gen. Sir Edward Northey, late Governor of Kenya, Generals Sheppard, O'Grady and Orr, and Colonel Wedgwood, M. P., also Capt. F. E. Guest, who, after fighting against General Smuts in South Africa, had the honor of serving on his staff in the East-African campaign.

Miss Ishbel MacDonald came back from her American trip with her father to a completely renovated 10 Downing Street, London, the official residence of British Prime Ministers. When she left, painters had started work upon the outside, but within, this old house was dingy and forlorn. Now the electric lighting in what is known as the banqueting hall has been renovated. The drawing- ronto).

room, which is Miss Ishbel's especial kingdom, has been redecorated. Bedrooms have been repapered, and new curtains put up. China, glass, linen, pots, pans and kettles, for which the State is also responsible, have been gone over. Mr. MacDonald's library and Miss Ishbel's morning room have all come in for attention. The First Commissioner of Works and Public Buildings has begun at the top ere it was needed to make the lirst Minister of the Crown feel at home.

Westminster Abbey is exchanging some of the somber tints of its nineteenth century grays and browns for the brighter colors used in its internal decoration five centuries ago. The work that is being done is on the canopies of the choir stalls. These are being repainted in blue, red and gold, at the cost of an anonymous donor, restoring them to what they were like in the Middle Ages. There has been some difference of opinion as to the desirability of the change, but the authorities are satisfied that they are restoring the past. "The abbey has never been so dull to look at as it is now," said one of the cathedral officials before the work began. "We are repeatedly revealing colors which lie under the crust of ages. All we are doing now is reverting to the old colorings of hundreds of years ago." 1 1 1

For many years the Royal Institution of Great Britain has ranked among its chief treasures the apparatus used by the great English savants of the latter end of the eighteenth and the beginning of the nineteenth centuries. These objects, newly arranged and labeled with exact details, can now be seen for the first time by the general public at the Natural Science Museum, South Kensington. This remarkable historic exhibition will remain open for six months or more during the rebuilding of the Royal Institution. In the exhibits, the visitor is able to trace the beginnings of the great electrical engineering and chemical industries of the present day, made possible by the discoveries of Davy, Faraday, and others. The Royal Institution of Great Britain was founded in 1799 on the initiative of the cosmopolitan Sir Benjamin Thompson, known better to historians as Count Rumford of Munich.

Mirror of World Opinion The opinions expressed in the quotations hereunder do not necessarily carry the indorsement of the Monitor.

Canada and the Liquor Problem

ONTARIO highways are among the finest in Canada, and her byways have long been considered trails of loveliness. Today the great roads and the little roads of Ontario are littered with empty bottles, whisky and beer bottles by the hundred thousand. And you needn't take anyone's word for it; you can start counting almost any where. But it is not safe to walk out there when so many drivers are sipping Ontario government liquor. Nor is it necessary to go out to the highways and byways at all. You can see the empty bottles in hotel rooms and corridors, in office and garage, in barn and bin.

The thing has become a danger and a nuisance. It has been going on for some time, getting steadily worse. At first we blamed it on the tourists, but we now know that the tourists couldn't account for one-twentieth part of the empties, even at the border. "The King's Highway" is the grand old title Ontario's Premier recently revived for the roads, and Ontario's Government is making these highways a byword among the people and a danger to the traveling public by its ever-increasing flow of liquor under guine of government "control."

The people of Ontario should know that their Province is selling \$50,000,000 worth of liquor a year. Is it any wonder that tens of thousands of youth are being added annually to the list of drinkers? Is it strange that motor accidents are increasing at an appalling rate? Why should anyone be surprised to find a few hundred empty bottles long a mile of the King's Highway?-New Outlook (To-
